

NEWS ALERT

Cortec® Eco Film® Featured In February Issue of Buildings Magazine.

BIODEGRADABLE BAGS

Cortec's Eco Film is a 100% biodegradable and compostable film designed specifically for the unique demands of compost programs. Eco Film replaces non-degradable starch and polyethylene-based films and is up to 300% stronger than polyethylene. The material combines strong performance while in use for landscape clippings or food waste and converts effortlessly into carbon dioxide and water within weeks of disposal. **Eco Film by Cortec Corporation. Circle 211.**
