### PRESS RELEASE

## Cortec's EcoLine® 3220 Assigned NSN By Defense Logistic Agency!

Cortec's EcoLine® 3220 has been assigned a National Stock Number (NSN) 6850-01-607-7343. The NSN will appear in the Army TB 43-0213; information regarding EcoLine® 3220 can be viewed on the public site WebFLIS.

[http://www.dlis.dla.mil/webflis/pub/pub\\_search.aspx](http://www.dlis.dla.mil/webflis/pub/pub_search.aspx)

EcoLine® 3220 is a 99% biobased ready-to use temporary coating made from renewable materials. EcoLine® 3220 provides multi-metal corrosion protection and lubricity in a variety of applications and is especially useful where application is required in freezing temperatures. With canola oil as its carrier, this product is environmentally safe, has excellent thermo-stability, and has no effect on

rubber, plastics, or paints. EcoLine® 3220 falls within the USDA BioPreferred Corrosion Preventative Category and is identified for Federal Agency Preferred Purchasing. [www.biopreferred.gov](http://www.biopreferred.gov)

The United States government, the North Atlantic Treaty Organization (NATO), and many other governments around the world officially recognize NSN. The Defense Logistics Information Service (DLIS), located in Battle Creek, Michigan, assigns all NSN at the request of the military services, certain federal and civil agencies, and foreign friendly countries. Manufacturers and suppliers do not have the authority to request a NSN. This is usually accomplished once a requirement or need for that manufacturer's item has been identified by a military service, NATO country, or federal/civil agency.
